SAFETY INSTRUCTIONS & WARRANTY

Electrical shock hazard! Installation of EV charger stands must be performed by a certified electrician in accordance with the country's electrical regulations. **Barkan is not responsible for the installation. Please request that the installer provide a warranty for the electrical and mechanical installation.**

Installation of EV charger stands is only permitted on stationary floors and ceilings made of concrete. The supplied fixtures are suitable for installation only on concrete floors/ceilings.

CAUTION! Ignoring the safety and assembly instructions may lead to the falling of the product and/or the electrical appliance. If you are unable lack the experience to carry out wall, ceiling, or floor installation, contact us for further advice. If installed by an equipped professional, please make sure they have the necessary assembly experience, have read and understood the safety and assembly instructions, work according to these instructions, and take responsibility for the installations.

- 1. Arm and stand installation surface** - It is permitted to install this product only on static floors, ceilings and walls made of: concrete, standard concrete blocks greater than 4" / 10cm, directly to the concrete or blocks or on wood studs at a minimum depth of 4 / 10cm. It is not permitted to be installed on wall cladding or plaster. It is not permitted to install the supplied hardware on: gypsum, aerated concrete, silicate, walls with water damage, weak/old blocks, or wood boards. It is permitted to be installed on a wooden pergola post made of natural (non-industrial) wood with a minimum size of 4"x4" / 10 x 10 cm. The attachment to the post should be checked every six months to ensure it is secure and has not come loose.
- 2. Placement and height of installation** - The wall arm needs to be installed in a way that doesn't allow people to collide with the product and become injured. The recommended height is 87" / 220cm.
- 3. Keep children and bystanders away from the assembly area.**
- 4. Tightening of bolts and screws** - Bolts and nuts that are 1/4" / 6mm in diameter or less should be tightened very carefully to avoid breakage.
- 5. Installation strength test** - Once installation of the product is complete, load weight onto it according to the requirements set forth in the assembly instructions.
- 6. Check electrical appliance connection to the product** - Following the attachment of the electrical appliance to the product, check that it is placed and connected correctly (according to the requirements), and cannot fall or become disconnected from the product. If you are concerned that the product does not fit the electrical appliance, contact the store where you purchased the product or check the FAQ (frequently asked questions) page on the Barkan website at www.barkanmounts.com or contact us through the site - / Support / Contact Us.
- 7. Periodic maintenance checks** - One month after installation, please check the following:
 - a.** The product is still tight against the surface on which it was installed.
 - b.** That the home electrical appliance is attached securely to the product.
 - c.** Any and all nuts, bolts, and straps have not become loose.

Repeat the maintenance checks every six months following installation. If any faults are found, remove the electrical appliance from the product and reassemble the product as per the assembly instructions.

- 8. Wall arms** - Oil the hinges during installation and once a year after that. Also, oil the hinges whenever it becomes hard to move the mount or if you identify rust on them. Movement of the mount is to be done gently, without touching the electrical appliance! Do not put downward pressure on the mount that could disconnect it from the wall.

PRODUCT LIABILITY - The duration of the product warranty in years appears on the product packaging as well as on the company website www.barkanmounts.com

Dear Customer - Thank you for purchasing Barkan's high quality product. We hope you enjoy it.

Barkan Mounts Ltd. undertakes to repair or replace this product in our warehouse, free of charge, on the condition that it is determined that it is flawed due to improper manufacturing or improper raw materials. When filing a claim under this guarantee, return the product using prepaid freight, with the original purchasing document, to the dealer or Barkan distributor.

The warranty does not cover the following:

Tip over, the installation of the product and the appliances on it, physical injury or property damage, accidental, direct, indirect, punitive, incidental, or consequential damages caused by:

- 1.** Non-compliance with the product's safety, use and assembly instructions.
- 2.** Connection of a product or item, which is not manufactured by Barkan and is not intended for attaching to the product.
- 3.** Changes or modifications made to the product, not by Barkan.
- 4.** Accidents or force majeure incidents.
- 5.** Sabotage, or any use other than the use for which the product is intended.
- 6.** Any damage caused to the electronic appliances or the surroundings due to the use of this product.
- 7.** Paint defects and scratches.
- 8.** Defects caused by ordinary wear and tear and deterioration, due to regular and frequent product use.
- 9.** Breaking of plastic covers.
- 10.** Rust, peeling, and swelling caused by: water, cleaning agents, high humidity, or weather damage from outdoor use.
- 11.** Extreme weather conditions.
