

JUICESTAND™ Pro

Commercial Charging Stations

Smart EV charging made simple with the affordable JuiceStand

Durable and affordable, JuiceStand is the perfect solution for multi-unit dwellings, workplaces and small businesses who expect light to medium EV traffic. JuiceStand's small footprint is ideally suited for locations with limited parking space and can include one or two UL Listed JuiceBox units, which are compatible with all electric vehicles. JuiceStand is our most affordable commercial EV charging station mounting solution and simplified installation, offering all the smart charging features businesses need to offer for private or public charging.

- **Flexible Design & Power:** Mounts one or two JuiceBox back-to-back charging stations in combinations of 32 amp, 40 amp, 48 amp and 80 amp outputs.
- **Easy Installation:** Save on installation with a cost-effective ground-mounted charging station.
- **Industrial Design:** Robust steel-construction stand is designed for durability in all-weather conditions.
